Tools	VS Code
Languages	HTML, CSS, ReactJS, BootStrap

Projects Details:

Project Name	**Compliance**		
Project Description	.The Compliance Management System is a comprehensive software solution designed to assist businesses in effectively managing and maintaining regulatory compliance. This project aims to develop a user-friendly and intuitive user interface using React.js, a popular JavaScript library for building interactive web applications. The React.js UI will provide an efficient and visually appealing front-end for the Compliance Management System, enabling users to navigate, access, and manage compliance-related tasks with ease.		
Duration	From: June 2023	To: current	On going
Platform	Windows		
Languages	Html, Css, Bootstarp, Reactjs		
Role	React Developer		
Responsibilities	●Develop the user interface using React.js and related technologies. ●Translate UI designs into functional and interactive web components. ●Implement responsive layouts and optimize the UI for various devices and screen sizes. ●Integrate UI components with back-end APIs for data retrieval and updates. ●Write clean and maintainable code while adhering to coding best practices and standards. ●Conduct unit testing and participate in system testing to identify and fix bugs or issues.
